1. Introduction

KEFARM is a modern digital farm management system that simplifies record-keeping and enhances productivity for farmers. This guide is intended to help users navigate and utilize the features of KEFARM effectively.

2. System Requirements

- Browser: Google Chrome, Mozilla Firefox, Microsoft Edge
- Internet connection
- Device: Desktop, laptop, tablet, or smartphone

3. User Roles and Access

- **Admin:** Full access to all modules and system settings.
- **Farmer/User:** Access to dashboard, records, and reporting tools.

4. Getting Started

Logging In:

1. Visit the KEFARM login page.
2. Enter your username and password.
3. Click the "Login" button.

Dashboard Overview:

The dashboard provides quick access to:

- Farm summary
- Livestock and crop updates
- Financial insights

5. Features & Modules

A. Farm Management

- Add new farms with location and type
- Assign users to specific farms

B. Livestock Records

- Add and manage livestock

- Track vaccinations, feeding schedules, and sales

C. Crop Monitoring

- Record planting and harvest dates
- Monitor crop health and yields

D. Finance Tracking

- Log income and expenses
- Generate monthly financial reports

E. System Settings (Admin Only)

- Update site title and email
- Manage user roles
- Accessible only through system_settings.php

6. Managing Your Profile

- Navigate to "My Profile"
- Update personal information and change password

7. Troubleshooting & FAQs

- **Forgot Password?** Use the password recovery option on the login page.
- **Unable to Save Records?** Ensure all required fields are filled and your session is active.
- **Page Not Loading?** Check internet connection and browser compatibility.
